Features

- AC input range selectable by switch
- Withstand 300VAC surge input for 5 second
- Up to 200% peak power capability
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Forced air cooling
- Built-in cooling Fan ON-OFF control
- 1U low profile
- Withstand 5G vibration test
- High operating temperature up to 65°C
- Operating altitude up to 5000 meters
- 3 years warranty
- MTBF>1KK hrs

Description

LRS-600N2 series is a 600W single-output enclosed type power supply with 41mm of low profile design. Adopting the input of 115VAC or 230VAC (select by switch), the entire series provides an output voltage line of 12V, 24V, 36V and 48V. In addition to the high efficiency up to 92%, with the built-in long life fan LRS-600N2 can work under -20~+65°C with full load. LRS-600N2 has the complete protection functions and 5G anti-vibration capability; It is complied with complete international safety regulations. LRS-600N2 series serves as a high price-to-performance power supply solution for various industrial applications. Moreover, LRS-600N2 can provide 200% short-duration peak power for motor applications and electromechanical loads requiring much higher power during start-up.

NOTE		- All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. - Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uF & 47uF parallel capacitor. - Voltage adjustment can only be operated within the input range of 100~120VAC or 200~240VAC. If the voltage adjustment is performed outside this range, it may cause abnormal output. - Length of set up time is measured at cold start. Turning the power supply on/off frequently may lead to increase of the set up time. - Once protections are triggered, 4min(Typ.) of cold down time is required before restart. - This power supply does not meet the harmonic current requirements outlined by EN61000-3-2. Please do not use this power supply under the following conditions: - the end-devices is used within the European Union, and - the end-devices is connected to public mains supply with 220Vac or greater rated nominal voltage, and - the power supply is: - installed in end-devices with average or continuous input power greater than 75W, or - belong to part of a lighting system Exception: Power supplies used within the following end-devices do not need to fulfill EN61000-3-2 - professional equipment with a total rated input power greater than 1000W; - symmetrically controlled heating elements with a rated power less than or equal to 200W - RCM is on voluntary basis and meets relevant IEC or AS/NZS standards complying with AS/NZS 4417.1 ※ Product Liability Disclaimer : For detailed information, please refer to https://www.meanwell.com/serviceDisclaimer.aspx

Function Manual

1. Peak Power

$$P_{av} = \frac{P_{pk} \times t + P_{npk} \times (T-t)}{T} \leq P_{rated}$$

$$\text{Duty} = \frac{t}{T} \times 100\% \leq 35\%$$

$$t \leq 5 \text{ sec}$$

P_{av} : Average output power (W)

P_{pk} : Peak output power (W)

P_{npk} : Non-peak output power (W)

P_{rated} : Rated output power (W)

t : Peak power width (sec)

T : Period (sec)

For example (24 model)

$V_{in}=220\text{VAC}$, $\text{Duty}_{\text{max}}=10\%$

$P_{av}=P_{rated}=600\text{W}$

$P_{pk}=1000\text{W}$

$t \leq 5\text{sec}$

$$T \geq \frac{5\text{sec}}{10\%} = 50\text{sec}$$

$$P_{npk} \leq \frac{TP_{av} - tP_{pk}}{T-t} = 555.5\text{W}$$
