DESCRIPTION

The X6-36W is a 36W, constant-current, IP65 LED driver that operates from 90-305Vac input with excellent power factor and low THD. It is created for industrial lights, tunnel and street lights. The high efficiency of these drivers and compact metal case enable them to run cooler, significantly improving reliability and extending product life. To ensure trouble-free operation, protection is provided against input surge, output over voltage, over temperature and short circuit protection.

NOTE:

This LED driver meets the EMI specifications above, but EMI performance of a luminaire that contains it depends also on the other devices connected to the driver and on the fixture itself.

PROTECTIONS

Parameter	Notes
Over Temperature Protection	Decreases output current, returning to normal after over temperature is removed.
Short Circuit Protection	Constant current mode and auto recovery. No damage will occur when any output is short circuited. The output shall return to normal when the fault condition is removed.
Output over Voltage Protection	Run into protection model when output voltage exceeds limit, and return to normal when the fault.

OPERATING AREA I-V

Notes: The drivers are not allowed to work in over-load condition, otherwise warranty will expire.

- Notes:**
1. $Y=M$, The minimum dimming current is about 5% I_{max} . When the output current is less than 5% I_{max} , the output current accuracy is not required;
 2. $Y=M$, When the dimming input signal reaches 0V or 10V PWM duty cycle to 0% or the resistance value reaches 0kΩ, the output can be turned off.
 3. $Y=V$, Resistance Dimming Curve.
